EDUCATION

BACHELOR'S DEGREE

Qis College of Engineering &
Technology

- CGPA: 8.1

PROFILE

Dedicated final-year Computer
Science student

Passionate about building scalable
applications

Proficient in full-stack development
Driven to innovate and grow in tech

PROJECT

Development of Dashboard for the Realtime Monitoring of the Cattle

- Designed and developed a GPS/GSM-based cattle tracking system using Arduino/Raspberry Pi, enabling real-time location monitoring and data transmission to ranchers, to prevent theft and optimize grazing.
- Implemented GPS collars for cattle, enhancing management and reducing risks.
